

EasySIGN 5 Print products	Print Server-Pro	Print Server-Master	Bundle
	Technology		
Optimized for multiprocessor and Intel HT technology			
Customisable file management for scalability			
Adobe Postscript Level 3 compatible			
Quality control over Postscript rendering			
PDF compatible			
Support for light ink inksets.			
Support for 6 color inksets.			
Variable dot support with user defined drop size usage			
User interface			
Logbook			
Internet enabled logbook			
Adjustable number of simultaneous filters, jobs and prints	1	5	5
Navigation tree for easy acces to complex settings			
Fully customisable user interface			
Zoom in on jobs and prints			
Administrator mode for easy setup			
Processing			
Superb printing speed			
On-the-fly printing for the fastest time to print			
Unlimited number of Hotfolders, with fully customisable settings			
Unlimited number of settings per device			
Multiple devices can be installed and printed to simultaneously	1	5	5
User controllable worker threads			
Design station			
Receive jobs from local computer			
Receive job from PC or Apple via network			
Automatic file format recognition			
Support for multipage files			
Print from any application using Postscript printer driver			
Print & cut			
Print & cut on separate devices			
Color management			
Create monitor profiles for better softproofing results			
Create scanner profiles using the supplied scanner target			
Unique visual linearisation, without the use of instruments			
Use densitometer instruments for linearisation			
ICC profile creation by desktop scanner, including itc target			
Input profiles can be selected for all possible situations			
CMYK colors can be unmanaged and unlinearised			
Dirty cyan, yellow, magenta suppression			
Spot color list to manage named colors			
Embedded/linked ICC support			
Full control over ink limit settings			
Color filters for finetuning of color rendering			
Contains standard ICC profiles			
Contains many predefined ICC profiles			
Support for 3rd party ICC profiles			
Diffusions			
Error diffusion			
Stochastic diffusion (improved)			

EasySIGN 5 Print products			Bundle
	Print Server-Pro	Print Server-Master	
User defined raster			
Pattern, coarse and fine			
Job Control			
Job previewing			
On screen color proofing			
Hold for operator' settings			
Number of copies/copy spacing			
Filter and render information			
Scale to size, horizontal or vertical			
Scale to percentage, horizontal or vertical			
Non-proportional scaling			
Rotating in 90 degree steps			
Mirror			
Automatic tiling			
Manual tiling			
On screen tiling			
Positive or negative tiling overlap			
Enabling or disabling of individual tiles			
Print extra information			
Automatic cropmarks			
Input profile selection for CMYK/RGB/Grayscale, Bitmap/vector			
Rendering intent selection for bitmap/vector			
Disabling of color management for CMYK vector/bitmap			
Print as Grayscale only			
Optional embedded profile usage			
Full color correction per individual job			
Brightness, saturation and contrast settings per individual job			
Job priority control			
Job archiving and automatic clearing			
Print control			
Print preview			
Print soft proofing and preflight			
Nesting of print jobs for material saving			
Nesting of individual jobs			
Manual nesting/positioning of jobs			
Multi-page nesting			
Start print manually			
Start print at specific date/time			
Start print on rendered length			
Start print on efficiency			
Confidence strip printing			
Ports			
Output to local port (LPT/serial)			
Output to Windows printer			
TCP/IP network printing			
Output to FILE			
Output to network share			
USB port			
Drivers			
All current sign printer models supported, see driver list for availability			
	Grey means that the feature is included
